- Operated and maintained Docker containers.

SKILLS

- Languages: Javascript, Java, HTML/CSS, Ruby
- Frameworks / Tools: React, GraphQL, node.js/Express, MongoDB, PostgreSQL, Docker, Ruby on Rails, AngularJS, MEAN Stack, Git, Agile, Jasmine

PROJECTS

Map My Beer Crawl Javascript, HTML5 / CSS3, Google Maps API, Bootstrap
https://mapmybeercrawl.firebaseapp.com/
An app to help you explore your urban environment. After getting your location, a dynamically generated beer crawl is generated along with a link to the directions in your maps application.

Secret Skate Ionic, AngularJS, PostgreSQL, node.js, Express   https://github.com/SecretSkate
An app for skateboarders to share tricks. Videos are uploaded with location data and displayed on a map.

Design Pattern Exercises Java   https://github.com/lukemccrae/designPatternsExercises
A repository where I push the exercises I've completed from the book Head First Design Patterns.
